

How much will it cost?

It's important to keep in mind the lifetime value that orthodontic treatment provides. Treatment fees are individually assessed and depend upon the complexity of the treatment required

The initial consultation costs £98 which includes a full diagnosis and radiographs.

We believe that the financial considerations should not be an obstacle to a beautiful smile. Interest free, low cost repayment plans (no deposit required) are available to help fund your orthodontic treatment, making private treatment much more affordable.

Our payment plans start from as little as £45.00* per month. Please ask for further details.

*subject to status, 0 % finance is available over an 18 month period.

Confidence in your smile

***“A winning smile can
be yours at any age”.***

Private orthodontic treatment is now
affordable, flexible and convenient.

What is Orthodontics?

Orthodontics is a specialist branch of dentistry which concentrates on the diagnosis and treatment of dental and facial irregularities such as crooked, crowded, protruding teeth and poor jaw alignment.

Put simply, the art and science of creating a beautiful and healthy smile is achieved by moving teeth with braces.

What can Orthodontics do for you?

Chapel Road Orthodontics can help you achieve the award winning smile you have always dreamed of, using the most sophisticated appliances and latest techniques combined with our clinical expertise. Our clients enjoy a pleasurable patient journey of transformation, gaining confidence in their smile.

Orthodontic braces are now more aesthetic than ever. State-of-the-art technology and materials allow treatment to be completed effectively and efficiently, with minimal inconvenience.

First impressions are lasting. You have one opportunity to create a great first impression, let us help you make the most of your smile.

- Enhanced self esteem
- Treatment can commence immediately, no waiting list
- Flexible appointment times
- Sophisticated appliances
- Use of state-of-the-art techniques and materials
- Private treatment offers all of the aesthetic options available
- Interest free flexible finance options

What options are available to me?

The white brace, In-Ovation C, is a very aesthetic way of aligning the teeth. It is increasingly popular with both our adult and child patients, who wish to have an inconspicuous appliance.

Inovation system braces are gentle with a special free-sliding technology, which places little pressure on teeth as they are gently guided into place.

The latest high tech white wires are used, ensuring rapid but comfortable progress.

DAMON®SYSTEM

Damon braces use a slide mechanism to hold the wire, which allows teeth to move more freely, quickly and comfortably. Above all, it is the way that this low friction system allows far more cases to be treated quickly without extractions, which makes the Damon System unique.

Damon braces are designed to be discreet and comfortable to wear. Combined with the latest high tech wires, this is the most efficient brace available.

orthocaps®

Invisible brace systems such as Orthocaps are a way of making minor tooth movements, with gum shield type aligners. A series of aligners are provided which gently and gradually guide the teeth into the desired position.

The aligners are removable and not worn whilst eating, drinking or cleaning your teeth.
